## Section 7. Handling and storage

### 7.1 Precautions for Safe Handling

#### **Handling**

Minimize breathing vapor, mist or fumes  
Avoid prolonged or repeated contact with skin

#### **Hygiene Measures**

Product is readily removed from skin by washing thoroughly with soap and water.  
Regular laundering of contaminated clothing is essential to reduce indirect skin contact with this material.

### 7.2 Conditions for safe storage, including and incompatibilities

Keep containers closed when not in use and store in a cool, dry, ventilated area.  
Do not handle or store near heat, sparks, flame or strong oxidants.

### 7.3 Specific end use(s)

#### **Exposure Scenario**

No information available.

#### **Other Guidelines**

Containers of this material may be hazardous when emptied. Since emptied containers retain product residues (vapor, liquid, and/or solid), all hazard precautions given in the data sheet must be observed

## Section 8. Exposure controls/personal protection

## 8.2 Exposure controls

**Engineering Measures** Ensure adequate ventilation, especially in confined areas.

### **Personal protective equipment**

**Eye Protection** Use splash goggles or face shield when eye contact may occur.

**Skin and Body Protection** Use chemical-resistant apron or other impervious clothing, if needed, to avoid contaminating regular clothing which could result in prolonged or repeated skin contact.

**Hand Protection** Use chemical-resistant gloves if needed to avoid prolonged exposure or repeated skin contact.

**Respiratory Protection** If exposure exceeds TLV, use appropriate NIOSH approved respiratory protection.

### **Environmental Exposure Controls**

Ventilation: Needed only if unusual operating conditions create concentrations in excess of TLV.  
Avoid smoking or open fire.

### 11.1 Acute Toxicity

#### Production information

<b>Inhalation</b>	Breathing mineral oil mists at levels above TLV may cause respiratory irritation and possible discomfort. Acute aspiration of large amounts of oil-laden material may produce a serious aspiration pneumonia. Repeated aspiration of small quantities of mineral oil can produce chronic inflammation of the lungs that may progress to pulmonary fibrosis. Inhalation exposure to oil mists below current workplace exposure limits is unlikely to cause pulmonary abnormalities.
<b>Eye Contact</b>	May cause minor eye irritation.
<b>Skin Contact</b>	Material expected to cause no more than minor skin irritation following prolonged or repeated contact.
<b>Ingestion</b>	Not expected to be acutely toxic by ingestion. Abdominal discomfort, nausea and diarrhea may occur.
