

Noack S2[®]

Volatility Test

ASTM D5800

Noack S2[®] Software Package

The Tannas Noack S2[®] Software Package provides real-time display of test temperature and vacuum control during the 1-hour test and temperature based automatic shutdown after test. It allows convenient entry of sample information and offers test result reporting at end-of-test.

The data analysis downloads to a .csv file for easy transfer into LIMS or conversion to an Excel spreadsheet. For more information on the Noack S2[®] Software Package, contact Tannas Co. and King Refrigeration at tannas@savantgroup.com or 989-496-2309.
